

The power of RAPOS™ in a small, light and mobile terminal. The RAPOS™ BTT also gives you expansion options

What it includes ...

The RAPOS™ BTT terminal is GPRS/GSM enabled embedded JAVA™ terminal. Its small size allows it to fit anywhere on your POS. Its quiet (fanless) motherboard means there are no moving parts in the terminal which directly translates into longer life and lower maintenance costs.

The inbuilt keypad and LCD are ruggedly designed for heavy usage. Additional serial ports provide expansion to connect a range of optional accessories from receipt printers to mobile phone barcode scanners.

The RAPOS™ BTT Terminal was designed to conduct secure electronic transactions over a wireless network. It comes complete with GPRS/GSM connectivity, and patented connection management software to optimise the bandwidth of 2 and 2.5G networks.

RAPOS™ (Redemption at Point of Sale)

The RAPOS™ BTT (Behind the Till) Terminal is a small, light and wireless multi-application terminal that gives you complete access to the RAPOSNet.

By combining an easy to use yet clear interface with simple “plug-and-play” deployment the RAPOS™ BTT Terminal has become the de-facto standard for redeeming mobile phone based promotions, vouchers and coupons at the POS.

In addition to this, the terminal can be used as a financial settlement device\* providing EMV Level 1 and 2 approval.

RAPOSNet

RAPOSNet is the wireless network infrastructure that enables full application control of the terminals. Application components can be deployed or reconfigured either through a web browser or JAVA™ API without the need to physically access the terminal.

\* Additional equipment required

**RAPOS BTT Hardware**

LCD	20 x 8 (Character) 128*64 Graphic
Keypad	16 Key Alpha Numeric Durable plastic Application specific keys
Network	IP based network access over GPRS
GPRS	Class 8 GPRS Modem (Siemens)
Processor	Embedded JAVA™ processor incl. memory
Serial Ports	2 serial ports for expansion modules, including printer or scanner etc.
Application	Embedded RAPOS client JAVA™ application
Physical	Weight: 1.0 Kg Width: 135 mm Depth: 210 mm Height: 100 mm
Power	5.3 V power supply (UK adaptor included) 2 Amp 2 metre cord
Optional	Mobile Barcode Reader Ticket or Receipt Printer EMV L1 Pinpad

**RAPOS Net Software**

Features	<ul style="list-style-type: none"> <li>• Remote Monitoring</li> <li>• Remote Management</li> <li>• Zero maintenance</li> <li>• Fraud free authentication</li> <li>• Unlimited number of campaigns per unit</li> <li>• JAVA™ Client application</li> <li>• Secure communication</li> <li>• Automatic application updates</li> </ul>
